

SE Requirements Document

1. INTRODUCTION

This document specifies requirements for the SE Process Execution Platform.
All requirements shall be verified through formal test campaigns.

2. SCOPE

The platform supports requirements quality gate, design review, and trade study skills.

Functional Requirements

3. FUNCTIONAL REQUIREMENTS

REQ-001: The system shall ingest PDF documents with unpdf primary parser.

REQ-002: The system shall detect CUI/ITAR banners and refuse ingestion.

REQ-003: The system shall produce RawParseResult with text and pages arrays.

4. SYSTEM INTERFACES

The system shall expose a `parsePdf(filePath)` function that returns a `Promise<RawParseResult>` conforming to the `corpus/types.ts` interface.

Non-Functional Requirements

5. NON-FUNCTIONAL REQUIREMENTS

5.1 Performance

The system shall process a 100-page PDF in under 30 seconds.

5.2 Reliability

The system shall fall back to mupdf when unpdf extraction fails.

5.3 Maintainability

All parser modules shall follow the wrap-and-rethrow error pattern.
